Project

Video game rental system, as the name suggests, is one stop website to rent or borrow video games. The website allows the users to create video game titles, post it up for selling/lending, buy/borrow the games that are up for grabs and review the seller and game after buying. We have listed core features we are planning to implement along with extra features.

GITHUB : <https://github.com/hahahakkkE7/CS-546-FinalProject-Group10>
